

### How to use params in the messages?

1. While uploading the Excel file, you can enter the corresponding parameters for that profile or phone number. Only then can you use it. After downloading the template, you can edit it as shown in the example below to assign params for that particular number.

	A	B	C	D	E	F
1	phone	param1	param2	param3	param4	param5
2	918847456XYZ	Ashutosh	Bisht	Dehradun	Uttarakhand	New Tehri
3						
4						
5						
6						
7						
8						
9						
10						
11						
12						
13						
14						
15						
16						
17						
18						

2. Select the group from the drop down for which you have added the params for phone numbers in send bulk message,

3. Now you can use the parameters in the message. If you type Hi, how are you %param1%?, then this will be the message received by the user:- <Hi, how are you Ashutosh?>.

**\*Message**

Hi , how are you %param1%?

Add custom variables: %param1%, %param2%,...

4. Param1 will be replaced by the corresponding value and user will receive this message:-

Hi, how are you Ashutosh? 6:30 PM ✓✓
