The step-by-step guide that explains how to set up and save a new proxy in WhatsApp:

Access Storage and Data Settings:

Step 1: Open WhatsApp on your device.
Step 2: Tap on the three dots in the upper-right corner (on Android) or go to **Settings** (on iPhone, this is typically found in the bottom-right corner).
Step 3: From the menu, select **Storage and Data**.

Set Up Proxy:

Step 4: Scroll down and select **Proxy** (this option may be listed as **Use Proxy** or **Proxy Settings** depending on your version of WhatsApp).

Enter Proxy Address:

Step 5: Tap on Set up Proxy.
Step 6: In the field provided, enter the proxy address: **188.34.185.230**.
Step 7: Once entered, press **Save** or hit the checkmark (depending on the platform).

Final Step – Press the Back Arrow:

Important: After entering and saving the proxy address, clicking on the checkbox may not appear to do anything.

Solution: Press the **back arrow** at the top of the screen to finalize the proxy setup and return to the previous screen.

This should save the proxy settings, and WhatsApp will now use the entered proxy for its connection.
